

climaflex[®] accessories

To complement the range of climaflex[®] tube preformed flexible insulation

These accessories are available as part of a complete package, to assist the contractor in the application of climaflex[®] tube. It is recommended that for the best result and complete satisfaction of application, the use of climaflex[®] accessories is a number one priority.

climaflex[®] accessories

climaflex[®] adhesive
self adhesive climaflex[®] foam tape
climaflex[®] clips
climaflex[®] heat reflecting radiator foil

climaflex[®] water based paint
climaflex[®] tape
climaflex[®] slitting knife
climaflex[®] stop cock covers

climaflex[®] adhesive

climaflex[®] adhesive provides the ideal solution for bonding climaflex[®].

The adhesive is available in 0.5 litre and 1 litre cans.
Handling and storage temperature: +10°C to +25°C.
Application temperature must be above 5°C.
Service temperature when cured up to 150°C.
The shelf life when unopened is 12 months.

climaflex[®] water based paint

climaflex[®] water based flexible coating is provided to protect climaflex[®] in an external situation against Ultra Violet Radiation (UVR).

climaflex[®] water based paint is environmentally friendly and can be used as a paint to enhance the finish of the installation in any situation.

The coating is available in 1 litre and 5 litre cans. (Grey only).
Handling and storage temperature: +10°C to +25°C.
Application temperature must be above 5°C.
Apply and cure under dry conditions.
The shelf life when unopened is indefinite.
A two coat application is recommended, with a drying time of two to eight hours depending on weather conditions.

self adhesive climaflex[®] foam tape

The tape is supplied in 3mm x 50mm x 10 metre rolls.
Its uses are many, making up awkward sections, wrapping up small valves, building irregular joints, additional support to climaflex[®] adhesive, wrapping butt joints and seams for extra protection are just a few.
Technical data and application procedure is the same as climaflex[®].

climaflex[®] tape

An economically priced PVC tape is available as an additional support when using climaflex[®] adhesive.
The tape is supplied in 30mm/20m rolls.

climaflex[®] clips

climaflex[®] clips are provided as additional support when using climaflex[®] adhesive. They are an ideal support when fixing the climaflex[®] stop cock cover.
The clips are provided in boxes of 50.

climaflex[®] slitting knife

climaflex[®] slitting knife is the ideal tool for slitting 2 metre lengths of climaflex[®].
Sold as a single item with 5 spare blades.

climaflex[®] stop cock cover

The climaflex[®] stop cock cover fits a standard 15mm internal stop cock, satisfying the minimum frost protection requirements under the new water regulations.

climaflex[®] heat reflecting radiator foil

climaflex[®] heat reflecting radiator foil improves the performance of any water filled radiator. The foil should be applied to the wall behind the radiator with a heavy duty wall paper adhesive. The foil is supplied in tile and roll form. Available in 1m² Flat pack (4 tiles each 60cm x 40cm) or 5 metre roll x 60cm (covers 3m²).

**Additional Technical and Health and Safety Data is available on request
for all climaflex[®] accessories.**
