INSULATION SUPPORT NET

Insulation Net is used to support insulation materials between floor rafters or in a vertical wall insulation and is simply installed by stapling or tacking to the rafters or vertical struts. The Insulation Net is allowed to sag between the rafters and will support a depth of insulation from 100mm to over 250mm. A single thickness of Insulation Net can span rafters up to 450mm apart and a double thickness up to 1200mm. Stronger nets for heavier installation or extra wide spans can also be supplied. The net is manufactured from a fully UV stabilised polypropylene, it is rot proof and chemically resistant. When correctly installed into an enclosed floor or wall, it will provide support indefinitely.

SPECIFICATIONS

ROLL SIZE	2m x 100m
MATERIAL	UV Stabilised PP
MESH SIZE	20mm x 20mm
COLOUR	Black
WEIGHT	15 grams m ²
CENTRE CORE	76mm diameter
TENSILE STRENGTH MD	1.2kN/m
TENSILE STRENGTH TD	1.7kN/m
YEILD POINT ELONGATION MD	25%
YEILD POINT ELONGATION TD	15%
WORKING TEMPERATURE	0 to 100c
MELTING POINT	165° C
